PRODUCTS TAKEN BY BAJAJ FINSERV

They have taken FIU product, FinPro, FIP product, FinShare and AA services. The implementation is done, it is now being tested.

The project was implemented under the supervision of Centre of Excellence, Bajaj FinServ, Pune. It is on their private cloud.

SUMMARY FOR ALL THE ABOVE IMPLEMENTATIONS

In all the projects we have completed the implementation of FIU (our brand name FinPro) and FIP (our brand name FinShare) modules. Some of the final steps are pending customer's internal security approvals and white listing of other AAs for interoperability testing.

Once the customers go live, they would be able to work with all licensed AAs, and we continue to integrate any new AAs licensed by RBI. The customers will be able to offer a seamless experience to all their consumers of different financial products and services. This will not only enable them to gain new consumers, retain existing ones, but also enhance credit quality due to timely information.

Further, we will be able to offer GST information for MSME consumers and loan monitoring on all their borrowers.
